PRODUCT MANAGER | B2B SAAS | DATA PLATFORMS | AI-NATIVE WORKFLOWS

SUMMARY

Product Manager with 6+ years in regulated, high-stakes B2B environments, building data platforms, APIs, and developer tooling used by internal teams and external partners. Proven track record owning roadmaps, translating customer needs into product requirements, and delivering reliable, scalable systems. Strong technical depth (cloud, data infrastructure, observability) paired with outcome-driven execution, stakeholder alignment, and fast, iterative delivery. Motivated to build AI-native products that improve professional workflows.

CORE SKILLS

Product Strategy & Execution: Roadmaps, OKRs, MVP sequencing, outcome metrics, discovery, prioritization, launch and change management
Customer & Stakeholder Alignment: Enterprise stakeholders, cross-functional leadership, requirements definition, feedback loops
B2B Platform Product: APIs, SDKs, self-serve onboarding, authN/authZ, versioning/deprecation, documentation standards
Data & Infrastructure: GCP (BigQuery), AWS, Azure, Kafka, Airflow, Kubernetes, Snowflake, Databricks
Reliability & Quality: SLO/SLI, incident management, observability, data governance, lineage, data contracts
Tools: Python, SQL, dbt/Dataform, Looker/Tableau, Figma, Claude Code, Cursor

PROFESSIONAL EXPERIENCE

Goldman Sachs â€” Stockholm, Sweden
Product Manager, Core Engineering, Market Data | Jul 2025 â€“ Present
â€¢ Own product vision and roadmap for real-time market data platforms serving trading, sales, risk, and reporting across global regions.
â€¢ Led delivery of developer-facing APIs, Python/Java SDKs, and self-serve workflows that improved discovery and integration for quant and engineering users.
â€¢ Partnered with engineering to prioritize reliability, scalability, and service quality, ensuring latency and resilience targets are met.
â€¢ Launched a cloud-native, multi-tenant pricing selection platform, tripling tenants in 6 months and increasing priced securities 10x while reducing operational cost.

SEB Group â€” Stockholm, Sweden
Product Manager, LC&FI, Trading & Custody Data Services | May 2023 â€“ Jul 2025
â€¢ Owned B2B data and API platforms supporting trading and custody products for 1M+ clients across retail and institutional segments.
â€¢ Defined and delivered REST/GraphQL APIs for internal teams and external partners, reducing integration time by weeks.
â€¢ Product Owner for two engineering squads (~18 engineers), aligning delivery with business goals, compliance, and regulatory requirements.
â€¢ Led migration to GCP and built a governed analytics and data distribution platform using
